Located on the Carrigaline Road, enjoy effortless access to Cork City and Douglas village. Within a short distance of some of Cork's main road networks, including the N28 connecting residents to nearby towns such as Carrigaline and the charming seaside town of Crosshaven. The access to the M28, currently under construction, will be close to the entrance to Carleton, giving access in both directions to Cork's entire road network.

This location combines urban convenience with the tranquillity of suburban living, offering the perfect balance for modern family life.

Carleton is easily accessible also via the new Ballybrack Valley cycle and pedestrian path providing easy access for residents to enjoy the many amenities Douglas has to offer. For the sporting enthusiast, there are endless options to keep you busy. Douglas Golf Club, Douglas Pitch & Put club, Douglas GAA club, Nemo Rangers just to name a few. If walking is your preference, Ballybrack Woods and Tramore Valley Park are in close proximity to Carleton.

- Painted finish to all joinery
- Traditional balustrades and handrail to stairs
- Downstairs cloakroom for storage

WINDOWS

- The windows fitted are high performance which are significantly more efficient than traditional double glazing previously utilised

INSULATION

- All our homes are constructed with superior levels of insulation and are carefully designed to reduce heat loss through floors, walls and roofs

AIR-TIGHTNESS

Air tightness simply means minimises all draughts. Draughts can be so small e.g. under window boards, around windows and doors but an accumulation can have a drastic impact on the energy loss in the dwelling and lead to significant discomfort and high running costs. We have incorporated air tightness membranes and other features to ensure that these homes are draught free and the heat does not escape from the fabric of the building.

AIR TO WATER HEATING SYSTEM

Heat Pump technology is one of the most advanced heating systems available today and is ideally suited for the Irish climate. The air source heat pump sits outside your home and extracts warmth from the outdoor air. It upgrades this renewable heat energy and transfers it inside the home to provide hot water and heating for radiators. The self-contained unit only requires electric and water connections. Like your fridge, it will do this quietly and reliably, all year round.
