## EXTERNAL FEATURES

- Distinctive architecturally designed render exterior
- Block Built
- Exclusive cobblelock paving to driveways
- High performance low energy PVC double glazed windows throughout
- Low maintenance PVC fascia and guttering with ventilation soffit

# Sustainability

.....

## EFFICIENT LOW-ENERGY DESIGN

The homes at Elmbury will enjoy many features designed to reduce energy consumption.

## WINDOWS

The windows fitted are high performance which are significantly more efficient than traditional double glazing previously utilised.

## INSULATION

All our homes are constructed with superior levels of insulation and are carefully designed to reduce heat loss through floors, walls and roofs.

## AIR-TIGHTNESS

Air tightness simply means minimises all draughts. Draughts can be so small e.g. under window boards, around windows and doors but an accumulation can have a drastic impact on the energy loss in the dwelling and lead to significant discomfort and high running costs. We have incorporated air tightness membranes and other features to ensure that these homes are draught free and the heat does not escape from the fabric of the building.

## HEATING

Heat Pump technology is one of the most advanced heating systems available today and is ideally suited for the Irish climate. The air source heat pump sits outside your home and extracts warmth from the outdoor air. It upgrades this renewable heat energy and transfers it inside the home to provide hot water and heating for radiators. The self-contained unit only requires electric and water connections. Like your fridge, it will do this quietly and reliably, all year round.
